EDUCATION

University of Florida Gainesville, FL
Bachelor of Science in Computer Science *Expected May 2027*
GPA: 3.61/4.00 — Dean's List

EXPERIENCE

EU Holidays – 3PlayTopia Intern ***Singapore***
Software Engineer Intern *May 2025 – Aug. 2025*

- **Automated** invoice generation and saved **$120/month** as well as **$35/transaction** by engineering a **financial accounting software** using **C++**, **MySQL**, and the **Zoho Books API**.
- Cut decision-making time by **50%** by implementing **Google Analytics** for full sales tracking and web traffic analysis.
- Increased website traffic by **53%** by enhancing a **TypeScript** website and **MySQL** database with a blog feature, bug fixes, and improved functionality.
- Improved customer support efficiency and delivered **instantaneous response times** by developing an **AI chatbot** using the **ChatGPT API**, automating **100+ customer inquiries**.
- Redesigned the company website in **Figma** and reorganized the **Figma workflow**, increasing design completion speed by **~85% (from 1 month to 4–5 days)**, significantly boosting team productivity.

PROJECTS

Convo-Coach *Jan. 2025*
AI Interview Coach

- Developed a **C++** application that analyzes audio recordings with **AI** to provide interview feedback.
- Integrated **Google Gemini API** to process and score behavioral, technical, and elevator pitch interviews.
- Built a **Flask backend** enabling seamless MP3 uploads and AI-driven feedback for **30+ users**.
- Connected front-end and back-end components using **JavaScript** and **Tkinter** to deliver real-time feedback to users.

Memory Manager for Reptilian Operating System *Nov. 2024*
Allocating, tracking, and freeing memory for processes and data structures

- Designed and implemented a custom memory manager in **C++** for an operating system, enabling efficient memory allocation and deallocation for processes and data structures.
- Developed **best-fit** and **worst-fit** allocation algorithms, optimizing memory usage and **minimizing fragmentation**.
- Leveraged **Valgrind** to detect and eliminate memory leaks, ensuring optimal performance and stability.

LEADERSHIP EXPERIENCE

Society of Hispanic Professional Engineers *Sept. 2024 – Present*
Technology Cabinet UX/UI Director

- Driving the **Figma** redesign of the SHPE UF mobile app and translating designs into production-ready **Swift code** to improve usability and visual consistency
- Boosted site traffic by **20%** by redesigning the SHPE UF website in **Figma** and implementing the designs in code, with the final version deployed to production.
- Designed the 2025 Code for Change website using **Figma** that deployed with 100+ users. https://code-4-change.com/

GatoRaas - Traditional Indian Dance Team Apr. 2025 – Present
Team Captain

- **Managed** a **50-member team** and a **12-person executive board** (fundraising, props, finance, media, logistics) to deliver a 15-minute performance.
- **Coordinated** choreography, music, and props, leading to qualification for the **National Raas Championship**.

TECHNICAL SKILLS

Languages: *C++, Python, Java, Swift, HTML, JavaScript, TypeScript, CSS, MATLAB*
Frameworks: *React, Node.js, Express, Flask*
Databases/Libraries: *MySQL, MongoDB, SQLite, PyTorch, Tkinter, TensorFlow*
